ONE HUNDRED DOLLARS

WASTE IS A TERRIBLE THING TO WASTE.

If an organization doesn't recycle their paper waste properly, natural resources end up in landfills. That's not good news. But if an organization doesn't work with Mid America to recycle, it could be even worse. Because they may think their current recycling process is as good as it gets. They'll never know how much more value could be captured from their waste, and that's almost like throwing money into a landfill.

WE TURN WASTE STREAMS INTO GROWING VALUE STREAMS.

Mid America designs recycling solutions for material recovery facilities and companies ranging from small businesses all the way up to multinationals in the Fortune 500. Our materials supply managers are on the front lines every day,

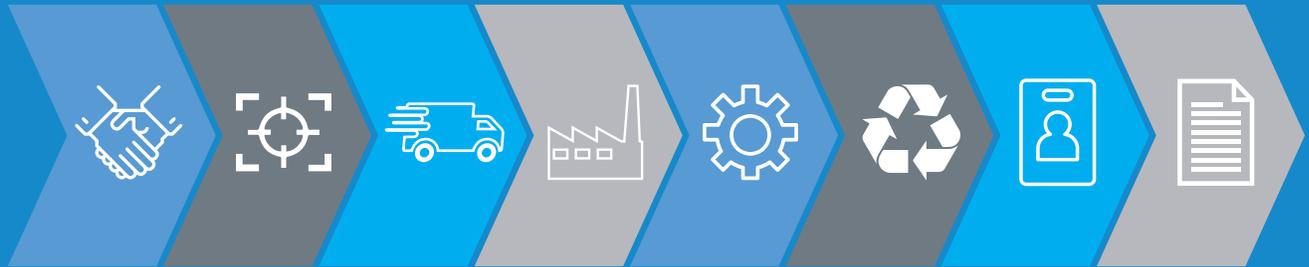

delivering solutions with continuous improvement principles. We analyze how waste is generated, how waste flows through plants, how loads are shipped, how processes can be improved, and how to generate more revenue per ton.

OUR MILL-DIRECT INSIGHTS WILL EARN A HIGHER PRICE FOR YOUR WASTE.

No two mills are the same. We know the equipment they're using, and precisely which paper grades they need, down to being able to match individual mill pulping machines with the most optimal fiber inputs. Paper mills rely on our supply expertise. We can secure a premium over prevailing market prices with insights most recycling vendors can't offer.

WASTE AUDIT PROCESS

The waste audit, based on continuous improvement methods, forms the foundation for our strategic business partnership with you.

ADVICE AND COUNSEL

We learn about your organization's goals and current initiatives.

COST STREAM ELIMINATION

We identify all your costs so we can minimize or eliminate them.

TRUCKING AND LOGISTICS

We evaluate your logistics and determine areas for improvement.

MILL DIRECT

We identify the paper mills who will pay the most for your waste.

BALING AND EQUIPMENT

We make recommendations on your equipment needs.

HANDLING OF RECYCLABLES

We maximize the value you collect from your waste.

PLANT TOUR

We tour facilities to optimize handling and equipment.

REPORT

We produce a report, and are accountable to its recommendations.

MID AMERICA PAPER RECYCLING
Growing The Worth Of Your Waste

WE FIND EVERY ANGLE TO REDUCE COSTS AND GROW REVENUE.

We understand the recycling challenges customers face because we deal with them firsthand. At our facility, we process over 50 grades of paper, and operate high speed balers, shredders, sorters, and guillotines. Our training programs will help your plant personnel improve safety and capture the most value possible using many of the same handling solutions we've used successfully at our own plant. In addition, our equipment and program recommendations are designed to reduce handling steps, increase safety, and eliminate costly rejections and downgrades.

A MISSION-CRITICAL LOGISTICS TEAM.

When it comes time to move your waste paper, we deliver. So does our own trucking fleet with 150 trailers, backed by a network of

freight brokers, individual carriers, electronic logistics boards, and 3rd party logistics partners. Overseeing it all is a dedicated team of coordinators who manage our brokerage division's transportation needs, ensuring waste materials get to the buyers that want it most.

WE TRACK RECYCLING RESULTS, SO YOU CAN REPORT ON ITS IMPACT.

We are responsive and accountable to your organization's goals for sustainability and increased revenue. We conduct quarterly meetings to review progress and agree on next steps. Status of individual projects, accurate and timely reporting on flows, rates, payments, recycling values, overall revenue generated and all of its resulting environmental impacts are tracked every step of the way.

A PROUD AND INDEPENDENT PARTNER.

As a fourth-generation family-owned company, it's our privilege to be at the forefront of an industry that has a positive impact on the environment. Our ownership team is vested in our relationships with customers and partners. Our financial strength is unwavering.

Above all, we know how to deliver higher productivity, safety, and economic value, all while turning waste streams into economic value streams. Global brands have benefited from our solutions, and so will you.

GLOBAL BRANDS HAVE BENEFITED FROM OUR SOLUTIONS, AND SO WILL YOU.
